

eDiscovery and Litigation Support

Failure to properly produce digital evidence in litigation can result in serious consequences including court sanctions and loss of reputation.

DriveSavers Electronic Discovery Solutions

- Manage the collection, processing and production of electronically stored information (ESI)
- Legally defensible and repeatable
- Customized to control cost
- Strict chain of custody documentation

Data Collection

DriveSavers can accommodate most ESI platforms and meets all security and confidentiality protocols required by our customers and the justice system.

Data collection services include:

- Identification of responsive content
- Preservation of data while maintaining integrity
- Custom solutions for proprietary and unique data sets

Data Processing

Advanced processing capabilities allow us to accurately reduce large volumes of ESI from multiple sources and formats. Our experts will cull through large amounts of data to produce a relevant subset of ESI for attorney review. Data can then be exported to a variety of formats to best accommodate our clients, including TIFF, native or PDF formats.

Data processing services include:

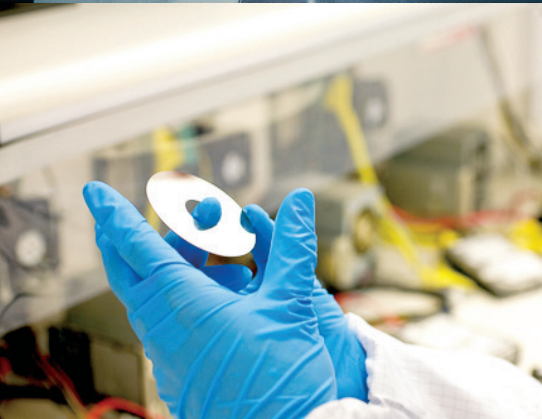

- File level deduplication/deNISTing
- Email threading
- Data searching (Boolean, keyword, metadata)

Expert Witness Testimony

Our recognized experts provide litigation support and expert witness testimony to substantiate digital evidence in court.

Data Recovery

Avoid spoliation sanctions that may result from lost or deleted data. DriveSavers can recover data from any device, including failed or damaged devices.

No Data, No Case

Don't Risk Losing Evidence

"The loss or destruction of evidence is an increasing problem for eDiscovery and forensic investigations."

— Bob Mehr, Sr. Legal Services Advisor

Certified Secure
