# NAVIGATING THE 1:1 INITIATIVE
## WITH THINKSPACE IT IT'S AS SIMPLE AS 1-2-3

Finding the right solution for your schools' needs can be overwhelming. But it doesn't have to be.

**1**

### CHOOSE YOUR COMPUTER

With choices like HP Stream EE and Chromebooks, we can help you navigate through the plethora of options to choose the model that's just right for your school.

**5**

### DAY TO DAY MANAGEMENT

The best is yet to come... Not only do we handle deployment, we're also there even afterwards to help keep your machines up and running to their full potential, and keep your students learning.

**2**

### CHOOSE YOUR COVER

No two students are a like, therefore it's crucial to protect your assets as much as you can. That's where covers come in handy, they give you a little buffer between your machine and the real world elements that could send your computer in for repair.
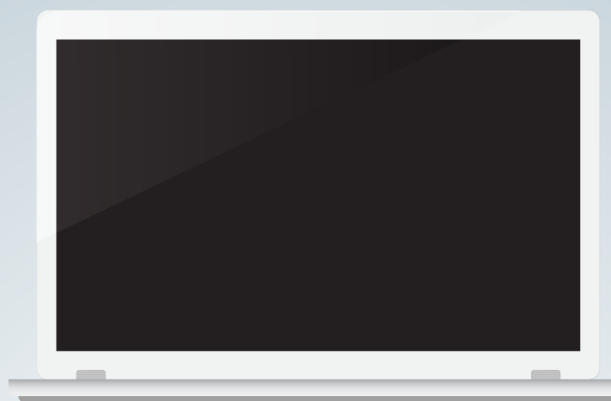

**4**

### UNPACK, PREP & DEPLOY

We are your one-stop shop. Not only do we guide you through the purchasing process, but our staff is fully trained to prep and deploy your !:1 intiative in a timely and complete manner.

**3**

### CHOOSE YOUR BAG

Another step in the protection direction, the right bag not only gives your students and easy way to tote their computers and accessories around, but it also protets your investment as well.

**we take it from here...**
